

Proposal Letter

24 June 2020

The Honorable Minister

Ministry of IDPs from the Occupied Territories, Labour, Health and Social Affairs of Georgia

REF : DONATION OF STANDARD-Q COVID 19 Antigen/Antibody Total Test

Dear Sir/Madam,

The above matter refers

We, SD Biosensor Inc (S. Korea), are pleased to express our appreciate for your purchase of our COVID Test KIT again. With gratitude, we would like to donate 250 KITS of STANDARD Q COVID-19 Ag/Ab Total Test to the Georgia.

As COVID-19 continues to spread everywhere without exception, the burden is real and the future has never felt so unpredictable. We realize these are challenging times for governments world over doing everything possible daily to stop the spread, support and sustain the infected and affected as well as keeping economies running. While there's a lot of uncertainty, we know that we need to adapt fast to our changing reality. Transitioning through this will require evidence based data to direct evidence based decision making for governments and countries to move into a safe new normal that ensures lives are protected amidst resuscitation of economic activities.

Based on FIND publication (http://www.finddx.org/wp-content/uploads/2020/05/FIND_COVID-19_RDTs_18.05.2020.pdf) on the use of the Rapid Diagnostic Tests (RDTs) for COVID-19, the value of these in epidemiological research and especially during the transitioning stages of the pandemic cannot be overlooked. The tests can be used in research to determine the magnitude of past exposures of the population to the virus (through antibody tests) and also determine new infections through (antigen tests). Such research will help contribute to the growing knowledge in the area as well as help inform policies and strategies as countries adapt to the new normal.

We believe our small donation, while it's not enough will go a long way in supporting government efforts against limitations of resources for health. We have local presence in this territory and world over through our strong distributor network who are always ready to offer support services and to help as may be needed in the shortest possible time. We, through them are at your disposal. The fight against the pandemic continues and through such partnerships, we shall overcome.

Best regards,

SD Biosensor, Inc.

Hyo Keun Lee / President
