

## COVID-19 Online Triage Tool by TLM360

The COVID-19 pandemic is putting pressure on healthcare systems across the world. This is particularly evident on populations in quarantine that may have medical needs requiring support not related to the pandemic. Emergency hotlines are depended on to perform the first line medical triage and only a few countries have started using online triage tools performed directly by the public to reduce the saturation of hotlines, decrease direct visits to doctors, and improve the large-scale triage process. TLM360 SAS, a digital health company, has developed an adaptable and ready-to-use online triage tool for all countries.

### Current situation without COVID-19 Triage Tool

### Expected situation with COVID-19 Triage Tool by TLM360

### TLM360 COVID-19 Triage Tool package

Tool	Customization	Implementation
Ready-to-use website	Adapted governmental content	Support for installation on your servers
