*Rotary Club
Rotary Club Tbilisi Ambassador*

First of all, I would like to express my gratitude for the support the Rotary Club and Rotary Club Tbilisi Ambassador provide to our country within the Global Grant #GG2012901.

In Accordance to the Resolution of the Government of Georgia of March 23, 2020, №184 government-owned Ltd. "Academician N. Kipshidze Central University Clinic" was instructed to use the land plot registered at the cadastral code of the land (real estate) №43.10.42.174 (address: Zugdidi Municipality, Rukhi village, including the registered land to the facility) to manage the infection (COVID-19). Rukhi Republican Hospital located on the transferred real estate was in a form of a building only, which was completely unequipped.

During this time, using various financial resources, the Rukhi Republican Hospital – branch of Academician N. Kipshidze Central University Clinic in Samegrelo-Zemo Svaneti Region – has been maintained to the point where it can perform the function of a fever center, thus accepting patients with mild to moderate COVID-19 symptoms. Besides, the clinic performs its main duty - treating a COVID confirmed patients. The clinic was able to receive the first patients on April 23, 2020. The building, in case of availability of relevant inventory, has the capacity to operate 220 beds.

It is important to take into account the fact that Rukhi Republican Hospital is the only clinic in Samegrelo-Zemo Svaneti region involved in managing the COVID-19 pandemic. At the same time, the location of the clinic is of special importance in the occupied territory of Abkhazia due to the physical proximity to the so-called border. With the critically high rate of COVID-19 infection recorded in occupied Abkhazia, Georgian citizens living in this area are deprived of the opportunity to receive quality medical care, which is why the number of patients from these areas is high.

Considering its importance in managing COVID-19 pandemic, Rukhi Republican Hospital requires Mobile X-Ray Digital Unit, as all patients, including critically ill patients frequently need due to the constant evolution of their clinical conditions.

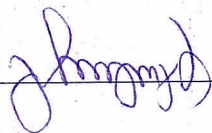

In case of receiving the proposed medical equipment, the clinic will be able to receive not only the patients, including from the occupied territories, with light and moderate symptoms, but also to treat severe and critically severe patients. Since local medical facilities are of great importance from the epidemiological point of view to prevent further spread of infection, the full equipment and maintenance of the Rukhi Republican Hospital will make it possible to treat patients living in Samegrelo-Zemo Svaneti region, as well as the patients living across the so-called border with occupied Abkhazia.

Donated equipment will be owned by the Rukhi Republican Hospital and the hospital will cover the maintenance and other related fees, after two years.

Sincerely,

Georgian Medical Holding

George Chogovadze

Director

08.07.2020

- Please be informed that the legal status of the clinic is LTD, but the state owns 100% of it. At the same time, the right to manage the 100% share of the clinic has been transferred to an organization with the status of a non-profit legal entity - Georgian Medical Holding
