Description

Abstract Text

The National Institute of Allergy and Infectious Diseases (NIAID), National Institutes of Health (NIH), the Department of Health and Human Services (DHHS) supports research related to the basic understanding of microbiology and immunology leading to the development of vaccines, therapeutics, and medical diagnostics for the prevention, treatment, and diagnosis of infectious and immune-mediated diseases. The purpose of this contract is to provide a broad range of research support services to the current and evolving NIAID-supported clinical research portfolio. The contract enables the NIAID to establish and maintain the robust and flexible resources required to facilitate and advance infectious disease research and establish and maintain support for product development activities for high priority vaccine, other prevention and therapeutic approaches. Support will be provided in four broad clinical research areas: a) clinical research management; b) clinical site assistance; c) clinical trial management and d) clinical trial compliance. This project will provide support services for the COVID-19 ACTIV2 Outpatient Monoclonal Antibodies And Other Therapies clinical trial.
