Dutch Public Health Foresight Study-2020

in the light of COVID-19

Henk Hilderink

Public Health Foresight Studies (PHFS)

- RIVM 25 years experience in PHFS
- COVID-19 new reality, other futures
- COVID-PHFS-2020
 - Exploring direct and indirect health & care effects
 - Short term (0-5 years) and mid/long term (10-20 years)
 - Goal: to support broader consideration of measures and to be better prepared in the future
- Addressing current events (short-cyclical products) and more extensive product in November

Approach

- What are we facing in the coming years?
 - Different scenarios

- What are the main societal challenges?
 - Different (normative) values
 - Policy / intervention strategies

- What are chances and choices?
 - Win-win, win-lose

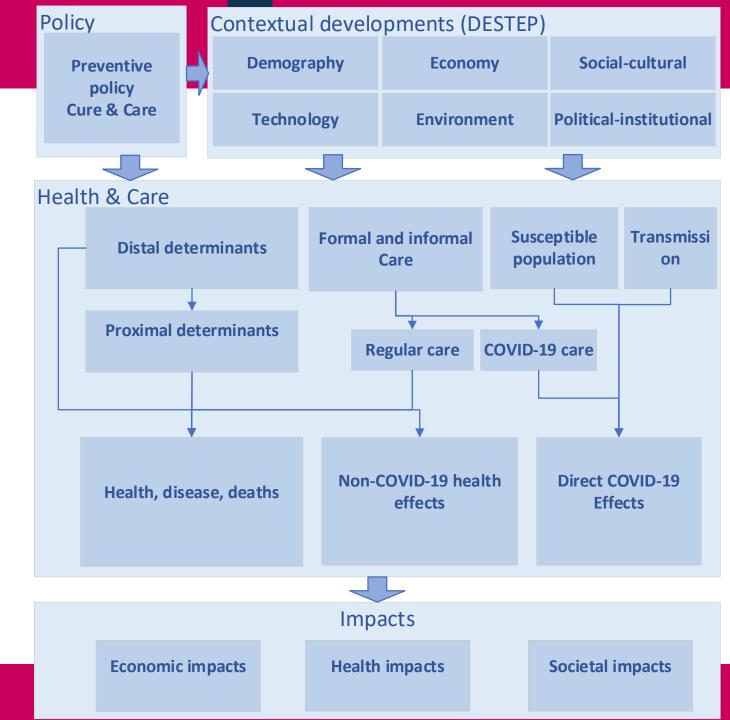

Impacts

- Direct COVID-19 health impacts (infected, care capacity, Burden of Disease)
- Indirect health impacts (Non-COVID-19)
 - Distal / proximal health determinants
 - Downscaling / avoidance of regular health care
 - Mental/Occupational/Environmental/External
 - Loneliness, perceived health, autonomy
 - Health Inequalities
- Also positive impacts (e.g. cleaner air, innovation, cohesion)

Conceptual model

Data & information needs

- Good quality (comparable) data!
- Better understanding of changes in health care → health impacts
- Vulnerable groups

Stakeholder / expert workshops, e.g.:

- 2 Webinars: Future of Health Care in the Netherlands (13 May)
- Joint (RIVM, Euro Healthnet, EUPHA) foresight webinar:
 Pan-European COVID-19 Trends and Challenges (end June)
- Open to suggestions from the EHII network

Thank you
