Georgian Primary Healthcare Telemedicine  
Development Project Tender Commission

RE: Sustainable Success

To whom it may concern,

For nearly 30 years, AMD Global Telemedicine has been developing and deploying telemedicine solutions in 100+ countries around the world.

The purpose of this letter to confirm LTD LIME (registration number 404994486) has AMD's support to promote, sell & service our telemedicine solutions for the project. AMD also recognizes the importance and significance of the project to the Ministry of Health and to the people of Georgia. If given the opportunity, AMD will take responsibility to ensure our telemedicine products & software meet & exceed expectations. This includes assisting with and overseeing the successful installation.

One of the most important factors of any successful telemedicine program is training for the users and the doctors. AMD & LIME will provide customized & accessible training programs that allow any provider to feel comfortable participating in the telemedicine program. Having these types of training resources available will help to ensure sustained success for many years to come.

AMD Global Telemedicine is ready and prepared to immediately help the Ministry of Health deploy a world-class telemedicine program. Thank you for your consideration.

Kindly feel free to contact me for any further information.

Best regards,

Name: Riley Normandin

Title: Director, International Sales
