Nikoloz Arevadze – Chief Expert
Mobile: +995 577 741134
Email: nickare@ideadesigngroup.ge

We are a consultation company specializing in information design and development of software using most up to date web, server, desktop or mobile technologies. Our aim is to promote the use of modern information technologies in the government, public, business and other sectors.

Idea design group is mainly focusing on different IT projects (custom applications for clients) as well as developing wide range of its own packaged software and web applications that will serve organizations or private individuals.

Among our clients are: United Nations in Georgia – different projects including development of UN Georgia's website, Asian Development Bank – large scale infrastructure projects, including web application development; the Norwegian Mission of Rule of Law Advisers to Georgia (NORLAG) – development of web application for Georgian courts; also: USAID, HURIDOCs, GYLA, Legal Aid Service, Human Rights House, OSGF, East West Management Institute, different EU financed environmental projects. UNDP was one of the donors to finance our Case Management Software – "CASE BANK" that was initially developed for the Legal Aid Service and now is used by number of organizations. At present, one of our experts is working on the development of web application for UNDP - Flood Prevention Project in Georgia.

1.2 Fields of expertise

- **Web design and development of web applications**
- Development of desktop and mobile device applications
- Planning of databases and information systems
- Development of geographic information systems (GIS)
- Map design
- Development of web mapping applications
- Training

1.3 Information technology experience

- ✓ HTML/XHTML
- ✓ CSS
- ✓ PHP/MySQL
- ✓ JavaScript
- ✓ AJAX
- ✓ jQuery
- ✓ Adobe Flash
- ✓ ActionScript
- ✓ Flex
- ✓ .NET Framework
- ✓ MS SQL SERVER
- ✓ Adobe Photoshop/Illustrator/Dreamweaver
- ✓ CorelDRAW
- ✓ Autodesk 3ds Max
- ✓ Revit
- ✓ ArcGIS (for desktop, server, web and mobile devices)
- ✓ Code Gear (Delphi/Builder)

Please review the annex:

Annex 1. Extract from the Registry of Entrepreneurial and Non-Entrepreneurial Legal Entities (2 pp.)

AC

2. Proposed Methodology for the Completion of Services

2.1 Objective of the project

The objective of the project is to develop a Database and Web based Graphical User Interface (GUI) for children benefiting from State services including children living and working on the streets compatible with existing statutory databases; implement up-to-date web development technology and industry trends. The Website will be developed including the following considerations:

- 2.1.1 Design Web System in accordance with the security standards;
- 2.1.2. Ensure compatibility of the web system with the different systems: Android; IOS; MS Windows.
- 2.1.3 Ensure the use of appropriate web-security protocols.
- 2.1.4 Standardization of information regarding the beneficiaries
- 2.1.5 Improving case management

The key elements, structure and functionality of the Database and GUI are clearly expressed in the ToR, which makes it easier to understand the assignment and to plan the solution. Below we present the stages of project implementation and our proposed methodology.

2.2 Information gathering and planning

We will start with a needs and requirements analysis session to review the key needs of the Client and all details of the assignment. Using the information gathered from needs analysis; we will put together a plan for the Database structure. Our team will create the list of all main topic areas of the web system, as well as sub-topics; our web developer will make the final list of the proposed technology.

After information gathering and final planning the team will focus on specific goals and will move into the design phase. A professional designer will develop the effective and user-friendly designs of GUI.

Deliverable:

- **A report** that will include detail database structure, a list of agreed technology, adjusted work plan and time schedule

2.3 Development

On the development stage, we will create database, utilize the graphical and page layout designs to build the web system GUI. In the process of development, we will upload test versions to the Client's server so that the Client can view the progress any time. The project manager will send the notice on each major update.

Below we outline the key points of the development process:

- The database
- GUI markup (Front end development)
- Functionality (Back end development)
- Search tools
- Reporting Services

The compatibility and data verifications of this Database with other required systems (Database of vulnerable population, Database of the people with disabilities, Public Registry database, and School database of the Ministry of Education) will be provided by specially created web services.

Technology and Standards:

- PHP / MySQL
- HTML5 / CSS3
- JavaScript/jQuery
- Google Chart

2.4 Web system structure

Web system will include the following parts (modules):

- **The Beneficiary's Module** - the beneficiary entry sheet will consist several sections (tabs):
 - **General Data**
 - **Demographic Data**
 - **Physical data, health**
 - **Data about Development and Education**
 - **Social data**

3.10.14

- **Services**

- **Comparison/Identification Module** – Possibility to input several parameters (listed in the ToR) and to compare the newly inputted variables with the existing variables and calculate probable coincidences (to sort the rate of coincidences in a decreasing manner), and to report it to the user. Where the user will be able to double-check the finally differentiated probable coincidences one by one, and approve or reject the identity by visual inspection of the photo. AN

- **Detail Search module** – Universal search tool – possibility to find any data with any combination of the existing attributes in the database (specified search criteria).

After accessing this section, the user should be able to filter the database according to one or several variables, and retrieve the data in the form of table with filtered information: beneficiary name; surname; ID number, etc.

- **Analytical (Reporting) module** – Possibility to indicate some initial analytical parameters (for example: data period, age, sex, location, etc.) After accessing the statistics section, the user should be able to filter the database according to one or several variables, and retrieve the data in the following form:

- Table with numbers
- Graph – percentage and numerical data (Pie Chart and Histogram charts – with axis labels; titles and legends)

- **Dictionaries** – administration lists for all specified lists of all combo boxes on beneficiaries sheet (Religion/confession, Legal representative Agency Color of the eyes, Special features, Substance abuse and so on).

- **User Management module** – Registration of the users, definition of user roles (agency personnel, Visitor - personnel of a service provider (social worker, manager1, psychologist), Supervisor, Administrator) and authorization parameters (username and password).

Deliverables:

- **Web system beta version**– uploaded for the testing

2.6 Training and Maintenance

The project manager will personally conduct trainings for the Web system's users. The details and content of the training will be agreed with the Client.

Prior to the training sessions, web developer will write a customized Help Guide for the web system maintenance.

Mariam Zangaladze
October 2014

3.10.14

We will provide support and technical maintenance of the web system during one-year period after the actual launch of the web system (all costs included in the project price). Our team can be reached by phone, Email or Skype for consultations; meetings can be arranged when necessary. During this period, Idea Design Group will solve any technical issues (if arises) with the web system.

Ah

Deliverables:

- Training conducted
- Web system functionality and reporting finalized
- Written user manual

3. Qualifications of Key Personnel**Proposed Experts**

1. Mariam Zangaladze – Project Manager (Team Leader)
2. Nick Arevadze – Chief Expert, Data Architect
3. Anna Sharvadze – Designer
4. Teimuraz Surguladze – Web Developer
5. Valery Sarkisyan - Web Developer
6. Marina Fandoeva – Tester

Please review

Annex 3.1 - CV - Mariam Zangaladze (7 pp.);
Annex 3.2 - CV - Nick Arevadze (8 pp.);
Annex 3.3 – CV – Anna Sharvadze (2 pp.)
Annex 3.4 – CV – Teimuraz Surguladze (4 pp.);
Annex 3.5 – CV – Valery Sarkisyan (3 pp.);
Annex 3.6 – CV – Anna Sharvadze (3 pp.)

4. Time schedule

Below there we present the project implementation schedule by months:

(3) *[Signature]*

Mariam Zangaladze
 October 2014

3.10.14

Three months were required for the completion of the project in the Technical Assignment. In such case, the reporting module should be developed in parallel with the development of other functionality. In this case, it is necessary that all the technical requirements for the reports to be stated clearly in advance. In such case, it is possible to develop reporting module in three months.

Al

The rich experience of our experts suggests, that much more informative and higher quality reports can be prepared if first the other functionality is completed and implemented in testing mode. After viewing and using the product, managers will understand the architecture of the system and the structure of data in the new web portal and make more informed decisions regarding the content of the reports.

Task	I month	II month	III month	IV month
Clarification of the details, Preparation of the database structure and Web system Designs				
Development of the web system's main modules (User management, Dictionaries, Beneficiary module)				
Upload web system for testing data administration functionality and filling data in pilot mode				
User Training and preparation of user manual				
Development of the reporting modules				
First technical maintenance				

Mariam Zangaladze
 Director of Idea Design Group

35/37 Shartava St., 0160 Tbilisi, Georgia

Mob.: (995) 577 741134

Email: nickare@gmail.com

Personal Information

Marital Status: Married
Nationality: Georgian
Date of Birth: March 2, 1977
Place of Birth: Tbilisi, Georgia

Languages

Georgian - Native
Russian - Fluent
English - Fluent

Education

2010 – 2012

Tbilisi State University
 Faculty of Social and Political Sciences,
 (Major in Psychology, Minor in Social Geography)
Tbilisi, Georgia

1998 – 1999

University of Amsterdam
 Master of Logic Program at the
 Institute of Logic, Language and Computation
 (Department of Mathematical Logic)
Amsterdam, The Netherlands
 (Master's degree in Mathematical Logic)

1994 – 1998

Tbilisi State University
 Faculty of Applied Mathematics and Computer Science,
 Department of Mathematical Modeling
Tbilisi, Georgia

1993 – 1994

Tri-Center Community High School
Minden, IA, United States
 (US High School Diploma)

1992 – 1993 **World Laboratory**
 (Additional after school classes)
Tbilisi, Georgia

1983 – 1993 **Secondary School #55**
Tbilisi, Georgia

Courses / Certificates

2013 **UNDP Flood Prevention Project**
 Course on MIKE FLOOD flooding modeling software
*Tbilisi, Georgia (in scope of “Flood Prevention Project”
 funded by UNDP)*

2011 **UNDP**
 Course on Basic Security in the Field – Staff Safety, Health
 and Welfare
Online course and examination

2011 **Kandilli Observatory and Earthquake Research
 Institute (KOERI)**
 Course on ELER (Earthquake Loss Estimation
 Routine) – software for earthquake modeling and loss
 estimation
*Istanbul, Turkey (in scope of EMME project – Earthquake
 Model of Middle East)*

2003 **Lantmateriet**
 Course on ArcCadaster,
 (Building land cadaster management information system)
GÄVLE, Sweden

Professional Experience

08/2008 – present

Idea Design Group LLC

Tbilisi, Georgia

Chief Expert and Partner

- Business development
- Consultations in GIS and databases
- Project management

01/2013 – present

UNDP – Flood Prevention Project

Tbilisi, Georgia

Database specialist / Developer

- Supporting the hydrological and hydraulic modeling
- Developing software tools for the spatial calculation of damages, vulnerability and cost-benefit analysis
- Establishing web based geographic information system

10/2008 – present

Data Engineering Center (NGO)

Tbilisi, Georgia

Consultant and cofounder

- Planning web and database projects
- Training personnel

08/2012 – 07/2013

Developing Geospatial Urban Transport Management System

Funded by: Asian Development Bank

Implemented by: Eptisa (Spain), Idea Design Group (Georgia)

Beneficiaries: Ministry of Regional Development and Infrastructure of Georgia; Municipalities of 8 Georgian Cities

Tbilisi and 8 project cities of Georgia

National Team Leader

- Developing of desktop GIS application for managing urban transport and road data
- Providing training to MoRDI and city municipalities

08/2010 – 05/2011

Developing a Geospatial Urban Water Supply and Sanitation Utility Management System*Funded by: Asian Development Bank**Implemented by: Eptisa (Spain), Idea Design Group (Georgia)**Beneficiary: United Water Supply Company of Georgia
Tbilisi and 6 project cities of Georgia***National Team Leader**

- Developing a web application using ArcGIS Server technology for managing utility networks; publishing water and sanitation asset geodatabase in Internet
- Providing training to managers and technical specialists of UWSCG

10/2009 – 02/2011

Improvement of water quality monitoring and support for compatibility of information infrastructure of Georgia with principles of EU water policy*Funded by: SlovakAID**Tbilisi, Georgia***Web and Database Developer**

- Development of Water Quality Monitoring Web Database (PHP/MySQL)
- Transferring existing data into the new database
- Providing training

10/2008 – 10/2011

EU Tacis Project: Trans-Boundary River Management Phase II for the Kura*Georgia (Armenia, Azerbaijan)***Database Specialist**

- Development of common databases for the information management and data exchange between the project countries
- Preparation of proposal for improvements in the data structures, formats and information flows to facilitate decision making in the integrated water resources management in the project country
- Training for beneficiaries' staff including provision of necessary technical guidelines and instructions

08/2006 – 04/2008

PA Government Services*Georgia, Armenia, Azerbaijan***South Caucasus Water Program
(Funded by USAID)*****Database Specialist / Developer***

- Planning the structure of South Caucasus Water Cadaster Information System
- Developing web and desktop geographical information systems

09/2006 – 03/2007

UNDP*Tbilisi, Georgia***Building Database of Cultural Heritage of Georgia*****Database Expert / Developer***

- Planning the structure of the information system
- Developing the database of Cultural Heritage of Georgia (MS SQL Server, MS Visual Studio)
- Building geographical information system of Cultural Heritage of Georgia (ArcGIS)

11/2004 – 05/2008

GeoAnalytica LLC*Tbilisi, Georgia****Chief Expert and Partner***

- Business development
- Planning database development projects for different organizations
- Managing projects
- Developing training courses in databases

10/2003 – 07/2004

GTZ Project (Architectural Cadaster)*Tbilisi, Georgia****Software Developer / Database Expert***

- Managing team in Architectural Cadaster project
- Developing database software (using Borland Delphi, MS Access, MS SQL Server)
- Conducting trainings in databases

07/2003 – 10/2003

KfW Project (Land Cadaster)*Tbilisi, Georgia****Software Developer, Database Expert***

- Planning and developing Land Cadaster geodatabase
- Programming ArcGIS (automating tasks of working with land cadaster graphical data)
- Teaching geodatabase course

05/2002 – 10/2004

GIS & RS Consulting Center GeoGraphic*Tbilisi, Georgia****Software Developer, GIS Expert***

- Managing GIS projects
- Planning and developing information systems
- GIS analysis
- Developing database software
- Conducting trainings in databases and programming

06/2000 – 10/2000

Shorebank Advisory Services*Georgia (Armenia, Azerbaijan)****Software Developer, Database Expert***

- Administration of banking software (*Loan Manager Plus*) for local and regional staff

01/2000 – 05/2000

10/2000 – 12/2000

Institute of Cybernetics of Georgia*Tbilisi, Georgia****Mathematician, Web Developer***

- Scientific research (in Mathematical Logic)
- Maintaining computer network
- Maintaining web page
- Consultations in operational systems and office software for local staff

09/1995 – 08/1998

“Georgia Absolute Consulting”*(Georgian – American Joint-Stock Company)**Tbilisi, Georgia****Software Developer***

- Developing database software (using Borland Delphi)
- Automating tasks of developing Business Plans (using Visual Basic for Applications in MS Excel)
- Maintaining computer network
- Consultations in operational systems and office software for local staff
